## How to Use the Linkage Tool:

Drag the DUNS number onto the Linkage tool to open it and automatically run the request.
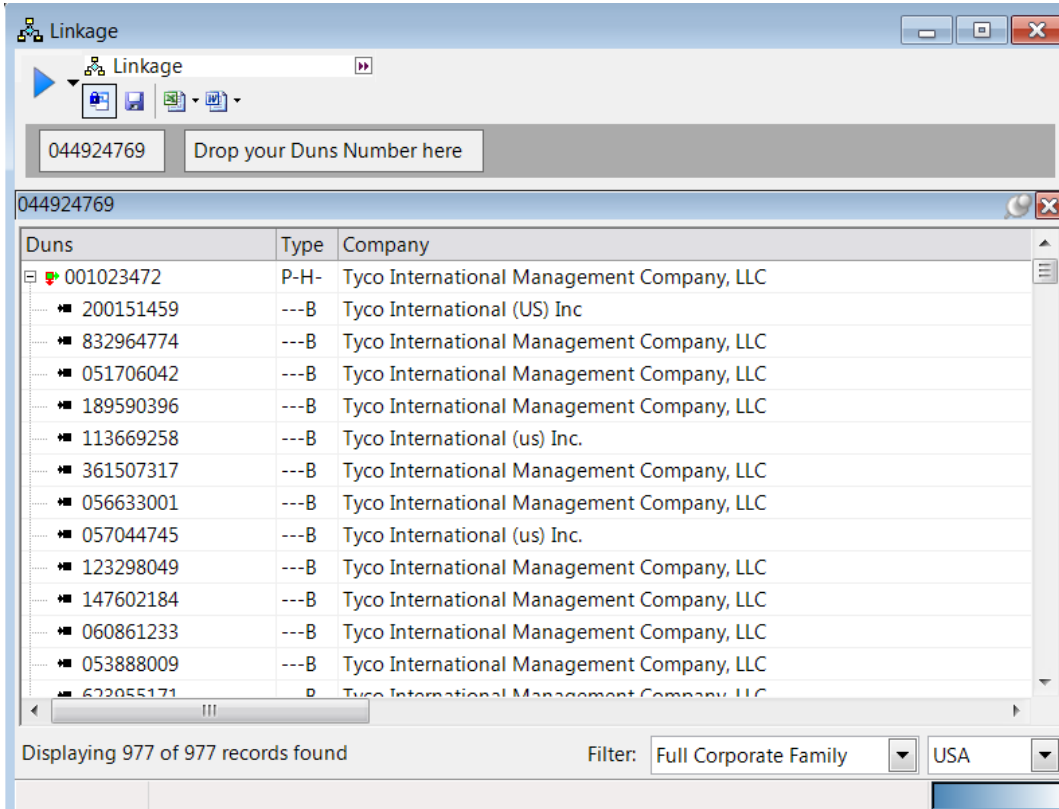

I've run a query and added a data grid with the DUNS number. Click on the DUNS to highlight it and drag it onto the Linkage tool on your toolbar.

The Linkage Tool opens with my DUNS in place and it will automatically execute the request and return the Corporate Family Linkage. Note, when it first opens it may take a moment to populate the linkage. Here's how it looks when it first opens.

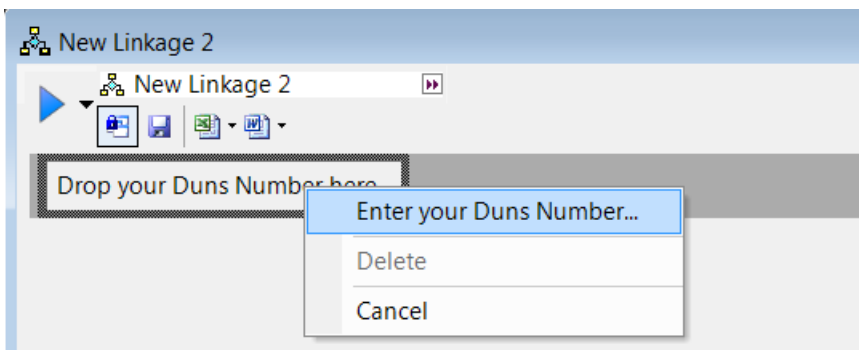

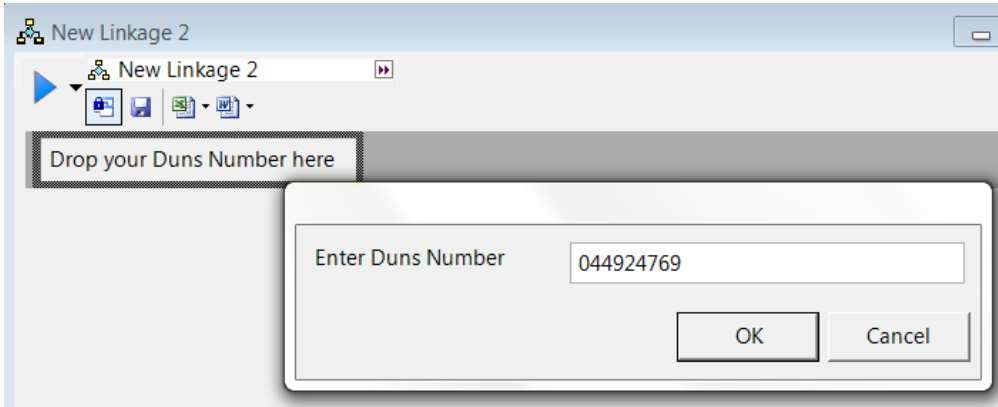

Here's what it looks like once it has returned the Corporate Family Linkage.
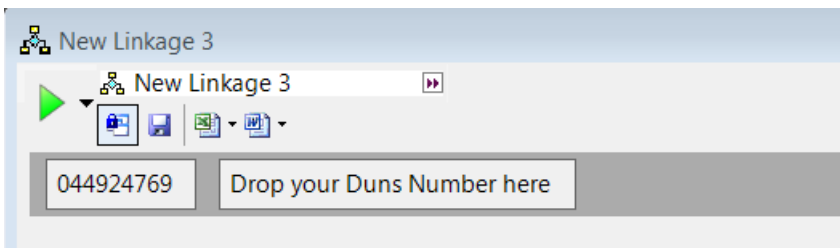

Alternatively, you can open the Linkage Tool and manually enter the DUNS number.

Right click on the "Drop your DUNS Number Here" box and select "Enter your DUNS Number"

Enter your DUNS number and then click OK and execute the request by clicking the Play button.

Here's your tree:
