Cubes:Switching Between Cube-Based Visualisations
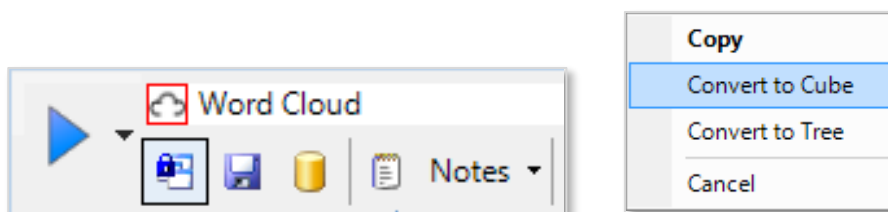

Release Date
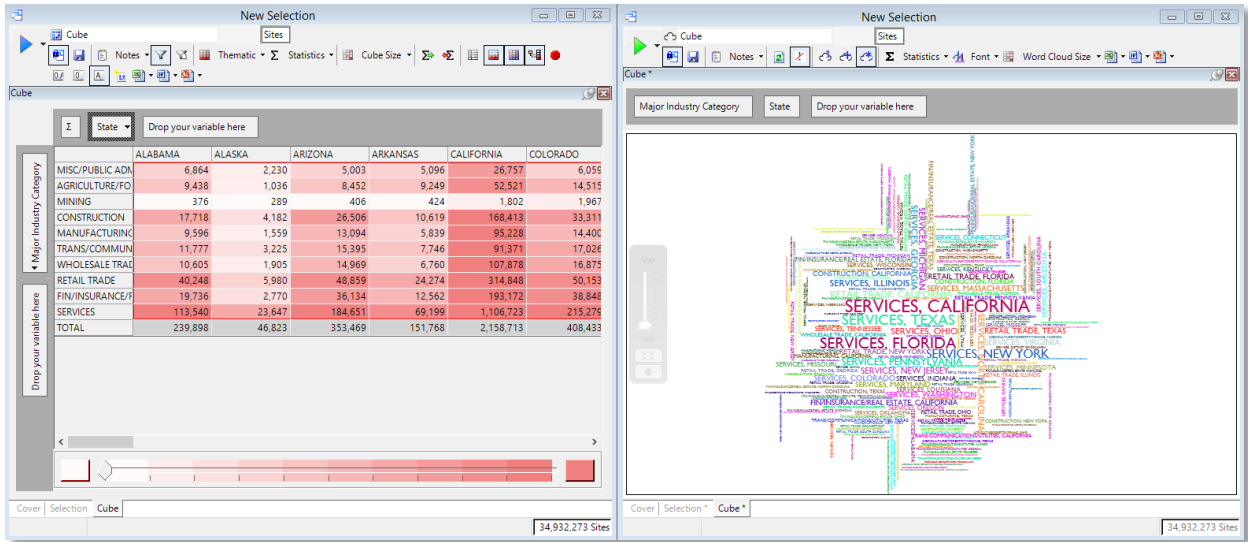

2016 Q2

Summary

Visualisations based upon Cubes can now be easily converted into many other Cube based visualisations.

A number of tools in FastStats are based upon Cubes. It is now possible in many cases to switch between these cube based views if you so wish. The tools that are affected are the Cube, Tree, Venn, Word Cloud, Map and Charting. See below for a list of the switching options for each tool.

To currently switch between views:

➢ Right click on the drag handle icon of the view you wish to switch and drop on the workspace (or on the ribbon bar if you are working in a maximised view)

➢ A pop up menu will appear with the **Convert** options available for that tool

➢ Click on the appropriate option and a new window will appear with that view being displayed

Visualisation Tool	Convert to… Options
Cube	Tree, Word Cloud
Tree	Cube, Word Cloud
Venn	Cube, Tree, Word Cloud
Word Cloud	Cube, Tree
Map	Cube, Tree, Word Cloud
Charting	Cube
