## Storyboard – Adding Data Grids

Release Date

2017 Q3

Summary

Data Grids can now be added to the Storyboard tool.

Data grids can be added to a Storyboard in the same way as other visualisations.

➢ Drag the Data Grid icon handle onto the **New** icon to start a fresh Storyboard or drag alongside existing pages to insert in an already open Storyboard

Data Grids can also be deleted, previewed and output to PDF or Word files in the same way as other visualisations.

When previewing any visualisation the full version of the object will be shown as opposed to being clipped to the A4 output page as in previous versions.
